PROJECTS

G2Mask

HTML CSS JavaScript Python Sass React Django

<https://gutwenger.github.io/g2mask2/#/g2mask/>

This is an ecommerce application built using React as frontend and Django as backend. Users can view items, review items, add items to cart, checkout, view orders and track orders.

G2Shoot

HTML CSS JavaScript Sass React

<https://gutwenger.github.io/g2shoot/>

This is a card game named "Shoot the Goal" developed using React. Playing cards objects are stored in an array for manipulations during different stages of the game.

Gut2Commerce

HTML CSS Python Django

<http://gut2commerce.herokuapp.com/>

This is an ecommerce auction website developed using Django. After registration, users are allowed to post new listings, place bids, comment and add listings to "watchlist."

Gut2Weather

HTML CSS JavaScript Python React Django

<https://gutwenger.github.io/gut2weather/>

This is a single-page weather app developed using React and Django. This app utilised OpenWeather API for live data. City data used to call API are stored in a separate database.

CERTIFICATES
